

# Digital Media - Public Relations, BS

## Program Description

The Digital Media Degree Program addresses the vast and ubiquitous forms of mediated communication that are available to all in today's world, including in politics, culture, society, and the arts. The program engages students in a wide range of media including television, streaming video, radio and podcasting, print and digital publications, and social media. Students study the history, evolution and the changing state of media technologies and techniques in media production, together with an understanding of the economic and social effects of media, including legal and ethical issues. Students are prepared for a wide range of careers, including those in journalism, TV and radio, video production, social media, publication design, podcasting, content marketing, public relations, and media research. The purpose of the program is ultimately to train students to be effective storytellers in each of these media forms and provide a foundation grounded in theoretical, legal, and ethical perspectives, and build on that foundation with the production skills necessary to be successful contributors to society and to gain meaningful employment.

## Program Curriculum

### 120 credits

### Utah Tech General Education Requirements

All Utah Tech General Education requirements must be fulfilled. A previously earned degree may fulfill those requirements, but courses must be equivalent to Utah Tech's minimum General Education standards in American Institutions, English, and Mathematics.
