

Enterprise Management, Bachelor of Applied Science (BAS)

Program Description

The Bachelor of Applied Science in Enterprise Management is a cohort model degree completion program designed for the non-traditional student who is interested in an integrated exposure to business concepts and decision-making processes. The courses are segmented by semester into stackable certifications, ultimately providing four marketable specializations: Accounting and Information Systems, Marketing, Enterprise Management and Entrepreneurship. The fourth semester provides a capstone experience, which incorporates an internship and community experience. For students with an AS degree from a USHE institution, the BAS degree is 62 additional credits if ECON 2010 was not taken as part of the general education requirements. The curriculum is intentional in its preparation, with a focus on employable skills and multi-disciplinary learning. At each level of the program, students will be exposed to a new certification and relevant applications to enhance retention. This degree will include upper division courses in finance, information systems & analytics, management, and marketing. Students will also complete an internship or project and a community experience.

Admission Requirements

- 60 credits including English and Math GE requirements
- Minimum College GPA of 2.5

Program Curriculum

122 credits

Utah Tech General Education Requirements

All Utah Tech General Education requirements must be fulfilled. A previously earned degree may fulfill those requirements, but courses must be equivalent to Utah Tech's minimum General Education standards in American Institutions, English, and Mathematics.
